Subject: Bayou Corne Gas Leak deployment

Hi Elaine,

I am attaching the SOW and IGCE I sent to Greg Fife, the OSC, for review and approval. Greg has sent it on the the Regional Office for funding a PR. I'm guessing Jo Gee has seen it already. The State and Local officials are holding a community information meeting tonight to let them know there will be a low flying plane in the area soon.

The time has not been finalized for the data collection since it is weather dependent. The hurricane currently about to enter the Gulf area is likely to cause at least some rain in the survey area so we would like to get this survey done Saturday, otherwise it may be several days before it clears. If possible could you give Sam a verbal to proceed while the administrative documents are being completed?
